

For our Consulting Team, we are currently seeking a:

# (Junior) Consultant

## Locations: Karlsruhe and Frankfurt

### We offer:

- Work on current topics such as autonomous driving and connected vehicles in combination with virtual test driving
- In-depth familiarization with our product portfolio and automotive development processes as well as simulation in the fields of ADAS and automated driving, powertrain and vehicle dynamics
- Permanent employment and a very positive work atmosphere
- A wide and interesting area of responsibility in which you can refine your independent way of working
- Flexible working hours and an attractive salary

### Your responsibilities:

- Providing support for consulting projects on a national and international level
- Ensuring the economic, technical and qualitative success of projects
- Supporting the preparation of proposals by specifying customer requirements for complex international consulting projects
- Designing innovative processes for the deployment of simulation in automotive development processes together with our Consulting Team
- Analyzing processes and developing concepts for the optimization, customization and transformation of development processes
- Evaluating trends in automotive development as well as their impact

### Your profile:

- Degree in a technical field such as automotive engineering, mechanical engineering, electrical engineering, industrial engineering or similar qualifications
- Interest or professional experience in automotive development and simulation
- Excellent conceptual abilities and communication skills
- High standards of quality for your own work, a well-structured and independent way of working and a keen perception
- Fluency in both German and English is a requirement as we operate on a global level
- Willingness to travel internationally to meet with customers

### WHO WE ARE

We are experts in the application areas of **ADAS & Automated Driving, Powertrain and Vehicle Dynamics** in the field of virtual test driving. As a global leader in virtual test driving technology, we develop innovative simulation solutions for vehicle development.

Designed for seamless use, our **software and hardware products** can be applied throughout the entire development process, from proof-of-concept to validation and release. Our virtual prototyping technology facilitates the **automotive systems engineering** approach, allowing our users to develop and test new systems in a virtual whole vehicle.

At IPG Automotive, we practice a **collegial spirit and teamwork**. We stand for **quality, holistic user orientation, efficiency, promotion of innovation and lasting partnership**. As a growing medium-sized, owner-managed business, we highly value the ideas and the commitment of our employees, for which we ensure the optimal conditions, always keeping a common goal in sight.

We look forward to your detailed application. Find further details and information on the application process at:
