

For our Product Management department, we are currently seeking a:

(Junior) Product Manager Simulation Software

Location: Karlsruhe

We offer:

- Challenging responsibilities and opportunities for development in an innovative and international environment
- The opportunity to contribute your own ideas and expand our simulation software field
- Flexible working hours and an attractive salary
- Permanent employment and a very positive work atmosphere

Your responsibilities:

- Strategic management and further development of our simulation software product portfolio, including the simulation software CarMaker, with respect to customer requirements
- Development of technical concepts in close cooperation with the Development department
- Trend scouting and definition of the product roadmap
- Professional support of customers during the evaluation and decision-making process
- Further development of materials in support of the Sales department
- Representing our simulation software field on customer visits, at specialist conferences and trade shows

Your profile:

- Degree in electrical engineering, computer sciences, mechanical engineering, industrial engineering or similar qualifications
- Experience in simulation methods or software development methods
- Initial experience in product management of technically complex products is a plus
- Distinct customer orientation and interest in occasional business trips
- Strong communication skills in English; knowledge of German is an asset
- A well-structured and independent workflow and a keen perception

WHO WE ARE

We are expert in the application areas of **ADAS & Automated Driving, Powertrain** and **Vehicle Dynamics** in the field of virtual test driving. As a global leader in virtual test driving technology, we develop innovative simulation solutions for vehicle development.

Designed for seamless use, our **software** and **hardware products** can be applied throughout the entire development process, from proof-of-concept to validation and release. Our virtual prototyping technology facilitates the **automotive systems engineering** approach, allowing our users to develop and test new systems in a virtual whole vehicle.

At IPG Automotive, we practice a **collegial spirit** and **teamwork**. We stand for **quality, holistic user orientation, efficiency, promotion of innovation** and **lasting partnership**. As a growing medium-sized, owner-managed business, we highly value the ideas and the commitment of our employees, for which we ensure the optimal conditions, always keeping a common goal in sight.

We are looking forward to your detailed application documents. Find further information and instructions on the application process at:
