

For our Product Management department, we are currently seeking a:

# (Junior) Product Manager Test Systems

Location: Karlsruhe

## We offer:

- Permanent employment with a very positive work atmosphere
- Challenging responsibilities and opportunities for development in an innovative and international environment
- The opportunity to contribute your own ideas and expand our area Test Systems
- An attractive salary

## Your responsibilities:

- Strategic management and further development of our Test Systems product portfolio with respect to client requirements
- Development of technical concepts in close cooperation with the Development department
- Carrying out market and competition analyses and identifying trends
- Professional support of customers during the evaluation and decision-making process
- Development of a portfolio of relevant use cases
- Further development of marketing material in support of the Sales Department
- Presenting the field of Test Systems to customers and at specialist conferences and trade shows

## Your profile:

- Degree in electrical engineering, computer sciences, mechanical engineering, industrial engineering or similar qualifications
- Relevant experience with hardware-in-the-loop technologies
- Initial experience in product management of technically complex products is a plus
- Distinct customer orientation
- You enjoy occasional business trips
- You are proficient in German and English and practiced in using all MS Office products
- The high quality standards you set for your own work and a structured, independent way of working as well as quick thinking complete your profile

## WHO WE ARE

We are expert in the application areas of **ADAS & Automated Driving, Powertrain** and **Vehicle Dynamics** in the field of virtual test driving. As a global leader in virtual test driving technology, we develop innovative simulation solutions for vehicle development.

Designed for seamless use, our **software** and **hardware products** can be applied throughout the entire development process, from proof-of-concept to validation and release. Our virtual prototyping technology facilitates the **automotive systems engineering** approach, allowing our users to develop and test new systems in a virtual whole vehicle.

At IPG Automotive, we practice a **collegial spirit** and **teamwork**. We stand for **quality, holistic user orientation, efficiency, promotion of innovation** and **lasting partnership**. As a growing medium-sized, owner-managed business, we highly value the ideas and the commitment of our employees, for which we ensure the optimal conditions, always keeping a common goal in sight.

We are looking forward to your detailed application documents. Find further information and instructions on the application process at:
