

For our Sales department, we are currently seeking a:

Project Manager

Location: Karlsruhe

We offer:

- Work on current topics such as autonomous driving and connected vehicles in combination with virtual test driving
- Permanent employment with a very positive work atmosphere
- An outstanding product portfolio to which you can contribute with your enthusiasm for international project management
- In-depth familiarization with our product portfolio and the entire range of use cases in the areas of driver assistance, powertrain and vehicle dynamics
- An attractive salary

Your responsibilities:

- Independent project management on a national and international level
- Ensuring the economic, technical and qualitative success of projects
- Supporting the preparation of proposals by specifying customer requirements for complex international engineering projects
- Coordinating project contents and preparing schedules in the planning phase as well as monitoring the project progress
- Organizing project meetings and coordinating the project team
- As a liaison between Sales and Application, you will work closely with these departments as well as with project partners and customers and see to a successful and on-schedule proposal submittal
- Further development of processes in project management and coordination of the project's documentation

Your profile:

- University degree in the technical or business administrative field and ideally several years of professional experience in project management in the automotive industry
- Strong interest in new technologies and distinct organizational skills
- Approachable appearance as well as excellent communication and teamwork skills
- The high quality standards you set for your own work and a structured, independent way of working as well as quick thinking complete your profile
- Fluency in both German and English is a requirement as we operate on a global level
- Willingness to travel

WHO WE ARE

We are expert in the application areas of **ADAS & Automated Driving, Powertrain and Vehicle Dynamics** in the field of virtual test driving. As a global leader in virtual test driving technology, we develop innovative simulation solutions for vehicle development.

Designed for seamless use, our **software and hardware products** can be applied throughout the entire development process, from proof-of-concept to validation and release. Our virtual prototyping technology facilitates the **automotive systems engineering** approach, allowing our users to develop and test new systems in a virtual whole vehicle.

At IPG Automotive, we practice a **collegial spirit and teamwork**. We stand for **quality, holistic user orientation, efficiency, promotion of innovation and lasting partnership**. As a growing medium-sized, owner-managed business, we highly value the ideas and the commitment of our employees, for which we ensure the optimal conditions, always keeping a common goal in sight.

We are looking forward to your detailed application documents. Find further information and instructions on the application process at:
