

For our subsidiary in the UK, we are currently seeking a:

# Solutions Engineer Automotive UK & Ireland

Location: Midlands

## We offer:

- Work in a company that is among the leaders in virtual test driving, and has built up decades of know-how in the area of closed-loop simulation technologies to accelerate the vehicle development process
- Work on current topics such as autonomous driving, electrified mobility and connected vehicles
- Vertical and lateral growth within the organization for excelling employees
- Permanent employment with a very positive and open work atmosphere
- An attractive salary

## Your responsibilities:

- Technical contact person for clients in the UK and Ireland
- Visiting trade shows and conferences
- Consulting and support for clients during the implementation of our products as well as preparing and holding technical workshops for industry peers
- Analyzing processes, applications and providing suitable recommendations for virtual vehicle development
- Liaison between product management and sales
- Continuous knowledge building with regard to customer applications
- Analysis of customer processes and requirements as well as development of solutions based on our products

## Your profile:

- Degree in the fields of mechanical engineering, electrical/electronic engineering, mechatronics, automotive engineering, computer engineering or similar qualifications
- Knowledge of at least one of the following fields: vehicle ECUs, vehicle dynamics, advanced driver assistance systems, powertrain, measurement technology and/or simulation technology
- Previous work with the CarMaker product family within thesis or industry projects is a plus
- Approachable appearance as well as excellent communication and teamwork skills
- Fluency in English
- Willingness to travel

## WHO WE ARE

We are expert in the application areas of **ADAS & Automated Driving**, **Powertrain** and **Vehicle Dynamics** in the field of virtual test driving. As a global leader in virtual test driving technology, we develop innovative simulation solutions for vehicle development.

Designed for seamless use, our **software** and **hardware products** can be applied throughout the entire development process, from proof-of-concept to validation and release. Our virtual prototyping technology facilitates the **automotive systems engineering** approach, allowing our users to develop and test new systems in a virtual whole vehicle.

At IPG Automotive, we practice a **collegial spirit** and **teamwork**. We stand for **quality, holistic user orientation, efficiency, promotion of innovation and lasting partnership**. As a growing medium-sized, owner-managed business, we highly value the ideas and the commitment of our employees, for which we ensure the optimal conditions, always keeping a common goal in sight.

We are looking forward to your detailed application documents. Find further information and instructions on the application process at:
