

For our Solutions Engineering department, we are currently seeking a:

# Technical Support Engineer

Location: Karlsruhe, München,  
Braunschweig, Frankfurt a. M.

## We offer:

- Work on current topics such as autonomous driving and advanced driver assistance systems as well as powertrain and vehicle dynamics in combination with virtual test driving
- Permanent employment in an innovative and international environment
- A wide and interesting area of responsibility in which you can refine your independent way of working
- In-depth familiarization with our product portfolio and further development of specialist skills in the areas of driver assistance, powertrain and vehicle dynamics or in the field of test systems

## Your responsibilities:

- Supporting and consulting our clients in their use of our simulation solutions as a member of our international and cross-cultural support team
- Acting as a technical contact person for use cases and questions on virtual test driving
- Planning, organizing and carrying out internal and external training courses
- Driving the continuous further development of our products by being networked with our clients' development departments
- Working in close cooperation with the internal product development and product management

## Your profile:

- Degree in a technical field such as automotive engineering, computer science, electrical engineering or similar qualifications
- Preferably initial experience in vehicle development and/or simulation
- Fluency in English is required, German is a plus
- Distinct communication skills and cross-cultural competence
- Programming skills as well as experience in using CarMaker are a plus
- Willingness to travel to meetings with clients on a national and international level

## WHO WE ARE

We are expert in the application areas of **ADAS & Automated Driving, Powertrain and Vehicle Dynamics** in the field of virtual test driving. As a global leader in virtual test driving technology, we develop innovative simulation solutions for vehicle development.

Designed for seamless use, our **software and hardware products** can be applied throughout the entire development process, from proof-of-concept to validation and release. Our virtual prototyping technology facilitates the **automotive systems engineering** approach, allowing our users to develop and test new systems in a virtual whole vehicle.

At IPG Automotive, we practice a **collegial spirit** and **teamwork**. We stand for **quality, holistic user orientation, efficiency, promotion of innovation and lasting partnership**. As a growing medium-sized, owner-managed business, we highly value the ideas and the commitment of our employees, for which we ensure the optimal conditions, always keeping a common goal in sight.

We are looking forward to your detailed application documents. Find further information and instructions on the application process at:
